

CIRCULAR INDICATOR BENCHMARK AND LINKS WITH LCA

Testimonial from ENGIE
Nathan Sonalier

Why was ENGIE interested for the CI benchmark ?

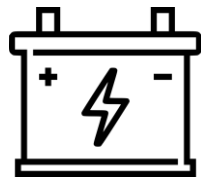

ENGIE Lab CRIGEN is involved in different projects dealing with Circular Economy

Industrial symbiosis with the BeCircle tool that enables to propose scenarios of development within territories

Ecodesign projects: how to develop and produce new services with lower impacts on the whole life cycle ?

Production

Distribution

Consumption

End of life

Analysis of value chains: where are the lack in terms of circularity ? What can be done to improve the value chain ?

There is obviously a need to understand circular indicators, how relevant they are and how to use them !

How will the study be used ?

Increase knowledge

Improve projects and tools
with circularity quantification

Improve the links
between LCA and
Circular Economy

Communicate and
sensitize on Circular
Economy within ENGIE

Thank you !
